### 4. FIRST AID MEASURES

**General advice:**
Move out of dangerous area.
Show this safety data sheet to the doctor in attendance.
Symptoms of poisoning may appear several hours later.
Do not leave the victim unattended.

**If inhaled:**
Remove victim to fresh air and keep at rest in a position comfortable for breathing.
If not breathing, if breathing is irregular or if respiratory arrest
occurs, provide artificial respiration or oxygen by trained personnel.
It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.
Get medical attention if adverse health effects persist or are severe.
If unconscious, place in recovery position and get medical attention immediately.
Maintain open airway.
Loosen tight clothing such as a collar, tie, belt or waistband.

In case of skin contact:
Wash skin thoroughly with soap and water or use recognized skin cleanser.
Remove contaminated clothing and shoes.
Get medical attention if symptoms occur.
Wash contaminated clothing before re-use.
Thoroughly clean shoes before reuse.

In case of eye contact:
Rinse immediately with plenty of water, also under the eyelids, for at least 10 minutes.
Remove contact lenses.
Protect unharmed eye.
Keep eye wide open while rinsing.
If eye irritation persists, consult a specialist.

If swallowed:
Call a physician immediately.
If swallowed, call a poison control centre or doctor immediately.
Take victim immediately to hospital.
Rinse mouth with water.
Remove victim to fresh air and keep at rest in a position comfortable for breathing.
If conscious, make the victim drink the following:
Give small amounts of water to drink.
Stop if the exposed person feels sick as vomiting may be dangerous.
Aspiration hazard if swallowed - can enter lungs and cause damage.
Do NOT induce vomiting.
If vomiting occurs, the head should be kept low so that vomit does not enter the lungs.
If unconscious, place in recovery position and get medical attention immediately.
Never give anything by mouth to an unconscious person.
Keep respiratory tract clear.
Loosen tight clothing such as a collar, tie, belt or waistband.
If symptoms persist, call a physician.
Immediately give large quantities of water to drink.
