- Show this safety data sheet to the doctor in attendance.
- Symptoms of poisoning may appear several hours later.
- Do not leave the victim unattended.

If inhaled
- Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
- It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.
- Get medical attention if adverse health effects persist or are severe.
- If unconscious, place in recovery position and get medical attention immediately.

In case of eye contact
- Rinse immediately with plenty of water, also under the eyelids, for at least 10 minutes.
- Remove contact lenses.
- Protect unharmed eye.
- Keep eye wide open while rinsing.
- If eye irritation persists, consult a specialist.

If swallowed
- Call a physician immediately.
- If swallowed, call a poison control centre or doctor immediately.
- Take victim immediately to hospital.
- Rinse mouth with water.
- Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- If conscious, make the victim drink the following:
  - Give small amounts of water to drink.
  - Stop if the exposed person feels sick as vomiting may be dangerous.
  - Aspiration hazard if swallowed - can enter lungs and cause damage.
- Do NOT induce vomiting.
- If vomiting occurs, the head should be kept low so that vomit does not enter the lungs.
- If unconscious, place in recovery position and get medical attention immediately.
